

Chairman and Commissioners of the Federal Communications
Commission,

I hear that there are three of you who, based upon your actions, seem to think that the airwaves do not belong to the American people. Who believe that they work only for the broadcasters, no matter how many citizen voices rise against the ill-conceived schemes they are concocting.

This citizen wants MORE federal regulation by the F.C.C., not LESS! I fully expect you to not only vote against the deregulation that you are planning, but to work to reinstate the fairness doctrine as it existed before 1994. So please stop pussy-footing around and start DOING YOUR JOBS!

Be advised that I shall work to ensure that anyone of you who votes in favor of deregulation, be exposed and prosecuted for fraud against the American people. I did not spend eight years in the U.S. Navy, to stand idly by and watch you shirk your duties to the citizens of this Great Nation, while your fascist masters line their pockets with the ill-gotten gains of a small elite who care nothing for Freedom of Speech, transparency of government, and the need to keep OUR airwaves and print media available for full and complete debate of the type that only a great number of media owners can provide. I can't fault the media titans for trying to get what they can... But I demand to know why YOU aren't doing YOUR job by serving the demonstrated will of the American People ahead of narrow special interests on this subject!

Hiding your justifications for this irresponsibility behind the Internet, and Satellite/Cable only serves to confirm the desperation of your reasoning... Read all of the mail, and the digital correspondence you are receiving... No one is buying what Chairman Powell, or Commissioners Abernathy and Martin are shoveling today! And those who claim that the current rules are getting impossible to enforce sound like extremely lazy people to me.

Read your correspondence... The American people are getting ready to drive the three of you out of the F.C.C. if you don't get with OUR program immediately!!! It is obvious why you are too afraid to honestly and fully debate your scheme before the average American. Because you know your plans would never survive exposure to the light of day.

I hope I never have to remind you again, who you are bound by law to serve, or who you WILL reckon with in the very near future should you fail to!

Sincerely,

William G. Bradshaw
